📄 **EXAM AZ-900 TOPIC 1 QUESTION 284 DISCUSSION**

Actual exam question from Microsoft's AZ-900

Question #: 284

Topic #: 1

[All AZ-900 Questions]

HOTSPOT -

To complete the sentence, select the appropriate option in the answer area.

Hot Area:

Answer Area

You have an Azure virtual network named VNET1 in a resource group named RG1.

You assign the Azure Policy definition of Not Allowed Resource Type and specify that virtual networks are not an allowed resource type in RG1. VNET1 ▼

is deleted automatically.
is moved automatically to another resource group.
continues to function normally.
is now a read-only object.

I remember reading something on thinkers it said it.would continue to function normally but would flag the resource for non compliance with the policy. Answer is correct.

Correct anwser - azure policy does have remediation tasks with some policies but Azure will not remove the resource here. It will just be flagged for non-compliance and as per the shared responsibility model, our account our responsibility.

The following are the times or events that cause a resource to be evaluated:
-A resource is created, updated, or deleted in a scope with a policy assignment.
-A policy or initiative is newly assigned to a scope.
-A policy or initiative already assigned to a scope is updated.
-During the standard compliance evaluation cycle, which occurs once every 24 hours.
(https://docs.microsoft.com/en-us/azure/governance/policy/overview)

(Doesn't count too much for this question but is good information)

KTrout 3 years, 7 months ago

Isn't this one Read Only Object vs continues to function normally?

👍 ↩ 🏳 upvoted 2 times

    KTrout 3 years, 7 months ago

    I appreciate you all getting back to me. Awesome site.

⊟ 👤 **GreenyErin** 3 years, 7 months ago

I've tried to find anything on the subject, but the only thing MS writes is that the resource becomes non-compliant - they don't mention any 'read only" or other changes that can happen to the resource. So I would assume the correct answer should be "function normally", but it's on the base of no other evidence rather than any solid source.

⊟ 👤 **vajeje** 3 years, 7 months ago

Your answer is correct. The RSG will get the status non-compliant. Unless you specify a remediation in the policy, the current configuration will not get altered.
