Given answer is correct

Given answer is correct.
https://4sysops.com/archives/azure-arc-manage-on-prem-windows-server-vms-with-azure-resource-manager/

Azure Arc allows organizations to extend the Azure Resource Manager control plane from the public cloud to their on-premises environments so that they can manage these resources like they natively existed in Azure and utilize services like Automanage.

Azure Arc is a service that allows you to manage on-premises servers and other resources as part of your Azure hybrid environment. With Azure Arc, you can use the same tools, APIs, and portals that you use to manage Azure resources to manage your on-premises resources as well.
