YYY is the answer.

https://learn.microsoft.com/en-us/azure/active-directory/reports-monitoring/concept-activity-logs-azure-monitor
Using Diagnostic settings in Azure Active Directory (Azure AD), you can route activity logs to several endpoints for long term retention and data insights. This feature allows you to:
- Send Azure AD activity logs to Azure Monitor to enable rich visualizations, monitoring, and alerting on the connected data.

https://learn.microsoft.com/en-us/azure/azure-monitor/alerts/alerts-overview
Alerts help you detect and address issues before users notice them by proactively notifying you when Azure Monitor data indicates that there may be a problem with your infrastructure or application.

You can alert on any metric or log data source in the Azure Monitor data platform.

   https://learn.microsoft.com/en-us/training/modules/describe-monitoring-tools-azure/4-describe-azure-monitor
   Azure Monitor is a platform for collecting data on your resources, analyzing that data, visualizing the information, and even acting on the results. Azure Monitor can monitor Azure resources, your on-premises resources, and even multi-cloud resources like virtual machines hosted with a different cloud provider.

   Azure Monitor Alerts are an automated way to stay informed when Azure Monitor detects a threshold being crossed. You set the alert conditions, the notification actions, and then Azure Monitor Alerts notifies when an alert is triggered. Depending on your configuration, Azure Monitor Alerts can also attempt corrective action.

https://learn.microsoft.com/en-us/answers/questions/683467/monitoring-synapse-pipelines-across-multiple-subsc.html

Based on the above, I feel B is YES. Tentant is not mentioned in the question, so it is possible to use Azure monitor

a. Azure Monitor Logs is a feature of Azure Monitor that collects and organizes log and performance data from monitored resources.
Reference: https://docs.microsoft.com/en-us/azure/azure-monitor/logs/data-platform-logs

b. Send resource logs to a Log Analytics workspace to enable the features of Azure Monitor Logs which includes the following:
----Consolidate log entries from multiple Azure resources, subscriptions, and tenants into one location for analysis together.
Reference: https://docs.microsoft.com/en-us/azure/azure-monitor/essentials/resource-logs

☐ 👤 **Gerardo1971** 3 years, 5 months ago
Correct answer
👍 ↩ ⚑ upvoted 3 times

☐ 👤 **hercu** 3 years, 7 months ago
Box 1 & 3 - Correct!
Box 2 is also Correct - Yes!
"A single Log Analytics workspace can monitor resources in all of your subscriptions as long as they are under the same Tenant."
Reference: https://techcommunity.microsoft.com/t5/azure-monitor/log-analytics-workspace-with-multiple-subscription/m-p/324805

👍 ↩ ⚑ upvoted 2 times

☐ 👤 **Sandy14nove** 3 years, 7 months ago
The second should be NO
Azure Monitor can be configured to monitor any Resource with any Conditions that you want, but when you save the monitor alert rule it is saved as an object in the same subscription that is selected when you choose the resource that you are monitoring.
👍 ↩ ⚑ upvoted 1 times

☐ 👤 **breton** 3 years, 7 months ago
The second should be No
👍 ↩ ⚑ upvoted 1 times

☐ 👤 **panal** 3 years, 8 months ago
Correct
👍 ↩ ⚑ upvoted 1 times

☐ 👤 **hf443** 3 years, 8 months ago
I think second question should be No. https://techcommunity.microsoft.com/t5/azure-monitor/azure-monitor-multiple-subscriptions/m-p/1348362
👍 ↩ ⚑ upvoted 2 times

   ☐ 👤 **hf443** 3 years, 8 months ago
   Having doubts now. According to https://docs.microsoft.com/en-us/azure/azure-monitor/platform/resource-logs.
   "Consolidate log entries from multiple Azure resources, subscriptions, and tenants into one location for analysis together."
   👍 ↩ ⚑ upvoted 3 times

      ☐ 👤 **TakumaK** 3 years, 8 months ago
      Thanks for the link to figure out the answer. Azure Monitor Logs is a feature of Azure Monitor. And Azure Monitor Logs consolidate log entries from multiple Azure resources, subscriptions, and tenants into one location for analysis together. This might lead the answer is Yes.
      👍 ↩ ⚑ upvoted 5 times

   ☐ 👤 **Shivaram_i** 3 years, 8 months ago
   I think Answer is correct.
   https://docs.microsoft.com/en-us/azure/azure-monitor/log-query/cross-workspace-query
