> Microsoft Defender for Cloud helps streamline the process for meeting regulatory compliance requirements, using the regulatory compliance dashboard. Defender for Cloud continuously assesses your hybrid cloud environment to analyze the risk factors according to the controls and best practices in the standards that you've applied to your subscriptions. The dashboard reflects the status of your compliance with these standards.
>
> When you enable Defender for Cloud on an Azure subscription, the Microsoft cloud security benchmark is automatically assigned to that subscription. This widely respected benchmark builds on the controls from the Center for Internet Security (CIS), PCI-DSS and the National Institute of Standards and Technology (NIST) with a focus on cloud-centric security.
>
> The regulatory compliance dashboard shows the status of all the assessments within your environment for your chosen standards and regulations. As you act on the recommendations and reduce risk factors in your environment, your compliance posture improves.

"Microsoft Defender for Cloud" is the answer.

https://learn.microsoft.com/en-us/azure/defender-for-cloud/update-regulatory-compliance-packages
Microsoft Defender for Cloud continually compares the configuration of your resources with requirements in industry standards, regulations, and benchmarks. The regulatory compliance dashboard provides insights into your compliance posture based on how you're meeting specific compliance requirements.

Can you view the regulatory compliance of your Azure resources in Azure Security Center?
If you've got any of the Microsoft Defender plan enabled on any of your Azure resources, you can access Defender for Cloud's regulatory compliance dashboard and all of its data
