📄 **EXAM AZ-900 TOPIC 1 QUESTION 400 DISCUSSION**

Actual exam question from Microsoft's AZ-900

Question #: 400

Topic #: 1

[All AZ-900 Questions]

HOTSPOT
-

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can deploy Azure Resource Manager (ARM) templates by using the Azure portal.	○	○
Azure Resource Manager (ARM) templates can define infrastructure by using code.	○	○
Each Azure resource to be deployed requires a separate Azure Resource Manager (ARM) template.	○	○

YYN

it is not necessary to use a separate template for each resource. For example, an ARM template can define a virtual machine, a storage account, and a virtual network altogether in a single template.

Passed the exam with 950, 36 questions, 1h time, about 3 new ones, the rest is all form here, i recall one which i will post.
Match the security layer:
multifactor auth (mfa) - Identity
video camera - physical security
software patches and update - compute
I already matched the answer, this was all drag and drop mixed columns on exam. Gl all!

Anyone on your team can run the code and deploy similar environments. To implement infrastructure as code for your Azure solutions, use Azure Resource Manager templates (ARM templates). The template is a JavaScript Object Notation (JSON) file that defines the infrastructure and configuration for your project.Jun 23, 2023

INHO - "code" is more than a definition format. For example - is a simple HTML page (no javascript) "code" or just a definition? If no loops, functions if/then/else, then is it really code?

I would choose YNN (and probably be wrong).

Got confused by Q2 and what they ment by "code", but JSON is a code format so the answer is correct - Y
