📄 **EXAM AZ-900 TOPIC 1 QUESTION 385 DISCUSSION**

Actual exam question from Microsoft's AZ-900

Question #: 385

Topic #: 1

[All AZ-900 Questions]

HOTSPOT -

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
Azure virtual networks deployed to the same Azure region are connected by default.	○	○
Virtual networks created in the same resource group must have unique names.	○	○
The Azure virtual network's address space must be unique within a subscription.	○	○

Passed my exam today. 925
About 3 new questions. Can only remember one.
New Question:
Are Scale set configured identically? Y or N
Can Scale set scale-up automatically? Y or N
Can Scale set scale-Down automatically? Y or N

Yes to all the question.

ANS: N Y N
No, your network address space does not have to be unique within your subscription. In Azure, the address space for a
virtual network is defined by you and is private to your virtual network12. This means you can use the same address space in
different virtual networks within the same subscription as long as those virtual networks are not connected.

  ⊟ 👤 **zellck** **1 year, 9 months ago**
  NYN should be the answer instead.

  Tried creating 2 virtual networks with the same CIDR range in the same subscription, and it works.

    Agree.

Yes, you can have two Virtual Networks with the same address space under the same subscription.

Can two Virtual Networks under the same subscription have the same CIDR blocks (10.0.0.0/ 16)?

Ans. Yes, you can have two Virtual Networks with the same address space under the same subscription.

But the address space of the First virtual network(10.0.0.0/ 16) will overlaps with the address space of the second virtual network(10.0.0.0/ 16), Virtual Networks with overlapping address space cannot be peered. If you intend to peer these virtual networks, change address space.

　　Please stop overthinking, the question no spicify if the vnet are isolate.

　　👍 ↩ 🚩 upvoted 2 times

　　　　⊟ 👤 **RougePotatoe** 1 year, 9 months ago
　　　　Its not overthinking. The question asked if the address space must be unique. He just presented information for NO.

　　　　👍 ↩ 🚩 upvoted 2 times

　　　　　　⊟ 👤 **zellck** 1 year, 9 months ago
　　　　　　Just tried creating 2 virtual networks with the same CIDR range in the same subscription, and it works, so it is NO for the 3rd statement.

⊟ 👤 **Kiwi28** 2 years ago
Create a virtual network - name must be unique in the resource group that you select to create the virtual network in. You cannot change the name after the virtual network is created.
