"Microsoft Defender for Cloud is a Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platform (CWPP) for all of your Azure, on-premises, and multicloud (Amazon AWS and Google GCP) resources." First sentence from https://docs.microsoft.com/en-us/azure/defender-for-cloud/defender-for-cloud-introduction. So first answer should be YES.

I agree:

"In addition to defending your Azure environment, you can add Defender for Cloud capabilities to your hybrid cloud environment to protect your non-Azure servers. To help you focus on what matters the most, you'll get customized threat intelligence and prioritized alerts according to your specific environment.
To extend protection to on-premises machines, deploy Azure Arc and enable Defender for Cloud's enhanced security features."

Y N Y is the right answer

3d1d88d 9 months, 4 weeks ago

the answers are totally messed up here, why the admin has not changed it?

3d1d88d 10 months ago

Q1 is tricky. It only says "monitor" which could either be performance monitoring or security monitoring. If it's security monitoring, then yes its the Defender

x_Examinator_x 1 year ago

yes, no yes

MES65 1 year, 2 months ago

Defender for Cloud collects data from your Azure virtual machines (VMs), Virtual Machine Scale Sets, IaaS containers, and non-Azure (including on-premises) machines to monitor for security vulnerabilities and threats

MES65 1 year, 2 months ago

Basic cloud security posture management (CSPM) capabilities in Microsoft Defender for Cloud are free. Cloud Security Posture Management is available at extra cost, and cloud workload protection capabilities are charged on a per-resource basis.

John_Creighton 1 year, 3 months ago

Cloud Defender Free for 30 Days.. Then it's pay. https://docs.microsoft.com/en-us/azure/cost-management-billing/reservations/save-compute-costs-reservations

Saxman 1 year, 5 months ago

Defender is most definitely NOT free. Lot of these test answers are terribly innaccurate which is not helpful.

speedyweedy 1 year, 5 months ago

Third is Yes

Microsoft Defender for Cloud (formerly known as Azure Defender) provides a Regulatory Compliance dashboard that allows you to assess your compliance with various industry and regulatory standards, such as ISO 27001, NIST SP 800-53, PCI DSS, and HIPAA.
The Regulatory Compliance dashboard provides a summary of your compliance status, including the number of controls that are in place, the number of controls that are not in place, and the number of controls that are being monitored. You can drill down into each standard to see the specific controls that are required and the status of each control.
In addition to the dashboard, you can also download a Regulatory Compliance report that provides a detailed view of your compliance posture. The report includes a summary of your compliance status, a list of controls that are required, and a list of controls that are in place or not in place. It also includes recommendations for improving your compliance posture and a roadmap for achieving compliance.

speedyweedy 1 year, 5 months ago

Second is No

No, Microsoft Defender for Cloud (formerly known as Azure Defender) is not a free service. It is available as a paid add-on to Azure services and requires an Azure subscription.
The pricing for Microsoft Defender for Cloud is based on the number and type of resources you want to protect, as well as the level of support you require. Microsoft offers several pricing tiers to suit different needs and budgets, ranging from a free trial for 30 days to a pay-as-you-go model and an annual subscription with a discounted rate.

It's worth noting that some Microsoft Defender for Cloud features are included with certain Azure services, such as Azure Security Center, which provides basic security management and threat protection for Azure resources at no additional cost. However, to access the full range of Microsoft Defender for Cloud features, you will need to subscribe to the service and pay the associated fees.
