Answer No Yes Yes

You can only manage cloud services from windows devices - No. You can connect to your Cloud PC on any platform that has either the Microsoft Remote Desktop app or an HTML5-capable browser to access the web client. Windows devices will provide the optimal experience

You can manage cloud services from the command line >> Yes

You can manage cloud services by using a web browser >> Yes . Microsoft Azure is an example of a public cloud. With a public cloud, all hardware, software and other supporting infrastructure is owned and managed by the cloud provider. You access these services and manage your account using a web browser.

The answer is correct!
NYY
For 2 question, see the table of Different shell environment, CMD is mentioned. So answer is correct.

I think the second question is wrong, please correct me if I am wrong.

You can't manage cloud services from a normal command line, you would need to install the Azure CLI.

same thoughts, question is a bit vague.

👍 ↩ 🏳 upvoted 2 times

SuperMat 1 year, 11 months ago

It does not specify if command bar is enough, it just says that you can.. and technically you can, so I guess the ans is Yes
