Scalability - Increase the compute capacity of apps in the cloud
High Availability: - Provide a continuous user experience with no apparent downtime
Geo-Distribution - Ensures that users always have the best experience by deploying apps to all the regions where there are users

    With High availability we can expect some down time. because its SLA is 99.95%. With disaster revery plan we can expect 99.99% means no downtime. And the question is "no down time".

        No, the question is no "apparent" downtime. Which means that there is downtime, but users won't experience it.
