📄 **EXAM AZ-900 TOPIC 1 QUESTION 61 DISCUSSION**

Actual exam question from Microsoft's AZ-900

Question #: 61

Topic #: 1

[All AZ-900 Questions]

DRAG DROP -

Match the cloud model to the correct advantage.

Instructions: To answer, drag the appropriate cloud model from the column on the left to its advantage on the right. Each cloud model may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point

Select and Place:

Cloud model	Work Area	
Hybrid Cloud		No required capital expenditure.
Private Cloud		Provides complete control over security.
Public Cloud		Provides a choice to use on-premises or cloud-based resources.

⊟ 👤 **AidenYoukhana** 2 years, 11 months ago

Private Cloud: provide complete control over security.

👍 ↩ 🏳 upvoted 1 times

⊟ 👤 **AidenYoukhana** 2 years, 11 months ago

Public Cloud: No required CapEx.

👍 ↩ 🏳 upvoted 1 times

⊟ 👤 **Vasupriya** 2 years, 11 months ago

Public Private Hybrid

👍 ↩ 🏳 upvoted 1 times

⊟ 👤 **Oulmy1** 3 years, 4 months ago

But doesn't Public Cloud also provides complete controle over Security?

👍 ↩ 🏳 upvoted 2 times

⊟ 👤 **AzureDrew** 3 years, 3 months ago

No. Public Cloud owns the hardware and goes through their Network. Complete control would be owning it in your private datacenter where you have access to the hardware and Network. Physical security is also a consideration.

mehasi 2 years, 6 months ago

Don't forget Private cloud can be again a third party that you might not have the full access.

"
A private cloud consists of cloud computing resources used exclusively by one business or organization. The private cloud can be physically located at your organization's on-site datacenter, or it can be hosted by a third-party service provider"
https://azure.microsoft.com/en-us/overview/what-are-private-public-hybrid-clouds/#private-cloud

Hybrid Cloud - Its combines an on -premises datacenter (Private cloud with a Public cloud) allowing data and application to be shared between them.
Private Cloud - to setup a Physical Server yourself, it need Capex (Capital Expenditure) and you are responsible for the Security and Maintenance of the Servers.
Public Cloud - like Azure, AWS. You don't need to manage Anything expect you deploy something then its your responsibility to upkeep it. It requires Opex (Operational Cost) or Pay-as-you-go means pay what you have used
